Completion - 06/2018

Java programming course covering object-oriented programming concepts, data structures and algorithms, and application of frameworks such as Spring.

PROJECTS

Pet Miao — Posts and videos: <https://linktr.ee/eduardo.ruiz1>

Development of a platform for pet owners with the aim of organizing information about vaccines and observations of their pets. Includes the possibility of generating a QR code that can be printed on the animal's collar to display the animal's data and its owner in case of emergencies.
