Professional Experience

Assectra Segurança do Trabalho – Full Stack Developer

04/2025 – Present

Development and maintenance of internal systems focused on document management, lists, and control of employees and contractors. Working with PHP (CodeIgniter 3 and Laravel 12), focusing on backend logic, data synchronization routines, and complex business rules. Advanced SQL queries with multiple table relationships using MySQL. Frequent use of AngularJS on the frontend and RESTful API integration. Experience with GitHub version control using Sourcetree and local development using Docker and WSL.

IOPAY – Full Stack Developer

06/2023 – 12/2023

Web application development using Laravel (versions 6 to 10). Advanced use of Laravel features such as queues, jobs, and Horizon. Enhancement of frontend interactivity using jQuery. Complex queries and data manipulation in MySQL, including triggers and procedures. Experience with cloud infrastructure on AWS (load-balanced instances, RDS with Aurora, and EC2) and deployment with CodeDeploy.

Potencialize Digital – Full Stack Developer (Contract)

01/2023 – 03/2023

Responsible for creating and maintaining PHP Laravel and JavaScript codebases, and using MySQL databases. Applied concepts of OOP and SOLID principles. Development of RESTful APIs, use of agile methodologies (Kanban), and version control with Git/GitHub.

Senac – Full Stack Developer Intern

12/2021 – 06/2022

Development and support of web applications using Angular, Java, and Spring Boot. Provided user support and worked with agile methodologies such as Scrum and Kanban.

Locaweb – Email Marketing Developer

05/2021 – 11/2021

Responsible for building HTML email templates, managing tasks through internal systems, and analyzing layout designs using CSS.

Education

Bachelor's Degree in Internet Systems – Centro Universitário SENAC

01/2020 – 07/2022

Graduated in Web and Mobile Full Stack Development, focusing on languages such as PHP, Kotlin, and Angular. Studied Object-Oriented Programming, MySQL databases, and agile methodologies.

Extension Courses

Android Development – Estação Hack (Facebook + MadCode)

Completed: 08/2019

Android application development using Kotlin, including API integration and native device resources.

UI/UX Basic Skills – Estação Hack (Facebook + MadCode)

Completed: 08/2019

Fundamentals of user interface and user experience design, covering usability, design thinking, and prototyping.
